VoIP & Analog Phones

■ General Dynamics Sectéra® vIPer™ Universal Secure Phone

GENERAL DYNAMICS
C4 Systems

The Sectéra® vIPer™ Universal Secure Phone provides the latest technology for both non-secure and secure, end-to-end Voice over IP and analog networks, eliminating the need for multiple desktop phones. SCIP and Crypto Modernization compliant, the vIPer phone is the only VoIP phone certified to protect information classified Top Secret/SCI and below, including Sensitive But Unclassified (SBU). The vIPer phone supports multiple key-sets for U.S. government sponsored interoperability (e.g., NATO and coalition).

Features

- Analog (PSTN) and VoIP (Cisco® Skinny Call Control Protocol [SCCP] or Session Initiation Protocol [SIP]) connectivity
- Simple switch between analog (PSTN) and VoIP networks via the easy-to-use menu
- NSA, JITC and TSG Certified
- Ideal STU/STE replacement — trade-in options available
- High-quality voice/low SATCOM latency
- Integrated security for Top Secret/SCI and below (no Fortezza card or CIK required)
- Secure data and fax transfer
- Free software upgrades available online
- Precedence and preemption

Cost-Effective, Modern Secure Phone

The Sectéra vIPer phone provides high-quality, clear voice and data communications for VoIP and analog networks in one device. Unlike other government secure phones, the vIPer phone is a single desktop phone with integrated security and PIN-based access control, eliminating the cost and labor associated with accounting for additional crypto cards.

Easy to Use and Manage

Simple to install, the vIPer can be set up out of the box within two minutes. The large, easy-to-read display is intuitive and user-friendly as is the web-based management tool. The vIPer phone can be managed by GEM X™ Encryptor Manager, which is also used to manage the widely deployed TACLANE® family of encryptors.

Ideal STU Replacement

The vIPer phone provides a smooth transition as your networks evolve from analog (PSTN) to VoIP. Simply switch between networks via the easy-to-use menu. STU/STE trade-in options are also available for users to upgrade to a more flexible, modern secure phone.

Customer Investment Protection Program

Invest in a phone with the latest technology, not a phone that retrofits older technology. The vIPer phone provides integrated security, capability for use on multiple networks, free software upgrades and trade-in programs for legacy phones. The vIPer phone is interoperable with all government secure phones, DoD networks and devices (JITC certified) and commercial IP phones (Avaya and Cisco).

Easy to Use

- LCD display with backlight
- Fast secure call set-up
- Web-based GEM X™ administration
- Fast, touch-free software upgrades for non-secure call features
- Supports DHCP for fast set-up

State-of-the-Art Technology

- Secure data transfer to other SCIP-capable devices (key material, secure fax)
- Commercial open standards
- Powered over Ethernet or AC
- MIL-STD-810F for temperature, humidity, vibration, shock and altitude
