Seismic Equipment Bracket for Cabinets

The Seismic Equipment Bracket prevents back-and-forth, side-to-side and up-and-down movement of shelf-mounted equipment by bracing the equipment's chassis to the cabinet's vertical mounting rails.

- Uses 1U of mounting space, securing equipment between 15" and 32" (380 mm and 810 mm) in depth
- The bracket easily adjusts into multiple configurations which provides security for shelf-mount equipment of different depth or height
- The bracket will adjust in depth for use in any of CPI's 24", 30", 36" or 39"D (610 mm, 760 mm, 910 mm or 990 mm) MegaFrame®, SlimFrame®, SteelFrame, Seismic Frame® Cabinets and TeraFrame® Cabinets

19" Width	23" Width	Color	Shipping Weight lb (kg)
14061-119	14061-123	Gray	6 (2.7)
14061-219	14061-223	Computer Beige	6 (2.7)
14061-719	14061-723	Black	6 (2.7)

Adjustable Bracing Kit for Cabinets

Attach bracing kit to cabinet top panel where there is a risk of seismic activity. Earthquake design criteria specify that equipment remain operational when subjected to earthquakes even though some small amount of repairable secondary physical damage may occur.

- Adjustable 24" to 36" (610 mm to 910 mm) distance from wall
- For use with M-Series, E-Series and Seismic Frame Cabinets

Note: For secure bracing, attach the cabinet to the floor using the proper floor installation kit along with CPI floor Anchor Clamp provided with each cabinet.

Part Number	Description	Shipping Weight lb (kg)
12477-X19	19"W Kit	6 (2.7)
12477-X23	23"W Kit	7 (3.2)
