**Applications: TCC and TCCD**
- For supporting rigid conduit to cable tray flange at each location where tray cable exits the tray and is run through rigid conduit raceway to control panel boards, motor starters and other electrical devices.

**Applications: TCGC**
- To provide a means for securely attaching a grounding conductor to cable tray to maintain grounding continuity for the entire cable tray system.
- To protect equipment through a reliable method for carrying ground fault currents.
- For installation indoors or outdoors, with most types of cable trays with inside or outside flanges.

**Features: TCC and TCCD**
- Clamps mount on all types of tray configurations (inside, outside or double flange).
- Exclusive design provides full 360° swivel, allowing exit conduit positioning at any angle, eliminating the need for separate inside or outside flange clamps, and field modification.
- Unique clamp mounting provides greater cable capacity and working area within the tray by reducing internal clamp obstruction.
- Exclusive TCCD double conduit clamps conserve space where multiple cables exit the tray at one location.
- Only four clamps fill needs for all conduit sizes from 1/2" thru 4".
- Fewer catalog numbers reduce job-site inventory and the chances of errors and confusion.

**Features: TCGC**
- Meets requirements of NEC Articles 250-77 and 318-6 for grounding and bonding.
- Quick and easy installation—low installed cost. No drilling or special tools required.
- Accommodates solid (where suitable) or stranded aluminum or copper grounding conductors from #6 to 2/0.
- Setscrew bonds the clamp to the tray and another setscrew securely attaches the grounding conductor to the clamp—outstanding pull-out and vibration resistance.

**Standard Materials**
- TCC and TCCD base and conduit clamp are malleable iron. Hot dipped/mechanically galvanized finish.
- TCGC has copper free aluminum body, electrotinplated.
- Nuts, bolts and other hardware are steel. Hot dipped/mechanically galvanized finish.

**Size Range**
- Type TCC (single conduit clamp) available in 1/2" through 4" conduit size.
- Type TCCD (double conduit clamp) available in 1/2" through 2" conduit size.
- Type TCGC accommodates wire sizes #6 to 2/0.

**Compliances**
- UL Standard 467.
