

Material Management For Construction

PLAN, ORDER, STAGE, TRACK AND DELIVER!

We do it all so you can do what you do best – install! WESCO's decades of experience in sourcing and logistics means what you need is on hand and on its way to your job site. Our material management plan is proactive. We work with you upfront so orders are released in a manner consistent with your project's schedule.

THE 3 GUIDING PRINCIPLES OF WESCO'S MATERIAL MANAGEMENT PLAN:

PROACTIVE

We look ahead to anticipate your needs and avoid obstacles

- Attend project planning meetings
- Collaborate on schedule, drawings and material quantities

CUSTOM

We create the right mix of products and services for your situation

- Determine a flow and sequence of the project through the various stages of underground, rough in, overhead, and trim out of the project
- Identify any unique needs

FLEXIBLE

We adjust to your schedule no matter how it twists and turns

- Effective staging and release in an organized manner
- The plan builds in the flexibility of checks along with way to address changes in construction without intensive stops of work and analysis by members of your site management and installation team
